**RE: Division Directive to Remove used tires at Dog Valley Mineral Mine S/105/0101**

Dear Mr. Wayne Western:

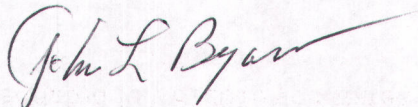

In your letter dated July 6, 2016 you stated that the division requires under Rule R647-3-107.1.12 the disposal of trash, scrap metal, wood, and extraneous debris. The Used Tires are used when transporting excavators to keep the machines tracks from sliding on the metal deck of the transport. I agree they are unsightly but they do have a purpose. We have removed them and will retain them with the transport. There is a similar set of "Used Tires" at our Crescent Junction pit. We will remove them also.

As far as the North Pit at Dog Valley, we are in negotiations at this time to supply that material to one of our customers. The material has a slightly differing composition from the other pit requiring a specific market.

We have also sent a copy of this letter to Mr. John Blake, SITLA, ([jblake@utah.gov](mailto:jblake@utah.gov)).

If we need anything additional, please let us know.

Thank You,

John L. Byars  
President United Minerals LLC.
